Feature	Cookie Name	Purpose	What will happen if you disable Cookies on this site?	Does the Cookie Persist?	Is the Cookie Essential?
Session	ASP.NET_SessionId	As visitors browse and interact with the web site, activity such as completing a form is recorded on the web server and this token allows us to refer to the user session data on the server between pages. More information: http://support.microsoft.com/kb/899918	No loss of function but there will be a very minor delay before each page load as authentication would be triggered for every page visited whereas the cookie instantly confirms visitors as anonymous	No	Yes
Buildportal	PortalModuleUserId	Stores portal state for non-logged in users so that if they visit again, portal preferences including portlet positions are remembered.	BuildPortal will reset upon each visit for non-logged in users, for logged in users, their preferences are stored in the database	Yes	No
Cookie Consent	AllowEasysiteCookies	Stores the consent status of the current user for cookies, only set if they consent	Site will prompt for Cookie Consent upon each visit	Yes	No
Decision Tree	ASP.NET_SessionId	Stores the selection state of the decision tree between visits to the page	The Decision Tree state will reset between visits to the page	Yes	No
eShop Order ID	OrderID	Stores order reference for users before they login	Non-logged in users cannot add items to their basket	No	Yes
Interstitials	InterstitialCookie	Stores whether an interstitial has been viewed / closed so it doesn't reappear for the current user	Interstitials will persist for the current user for those pages that convey them, such as language preference	Yes	No

Locales	ASP.NET_SessionId	Stores the locale (language) preference of the current user if they are not logged in	From v6.5+ there will be no loss of function as locales are maintained through the URL path	Yes	No
Remember Me	RememberMe	Stores authentication token between visits so users don't have to login on each visit	Users who wish to access restricted content or services will need to login upon each visit to the site	Yes	No
Mobile Redirect	mobileredirect	Stores mobile device users' preference for either the web or mobile site	Users will be asked upon each visit whether they would prefer to visit the web or mobile optimised site	Yes	No
Polling	EasysiteUserHasVoted	Stores whether the current user has already voted in the poll, preventing multiple voting	Single users will be able to vote multiple times in online polls	Yes	No
Tabbed Container	ActiveTab	Stores the ID of the Active Tab as selected by the user	Held tab states will be lost between visits to the page	No	No
Tracking Codes	DONATION_TRACKING_CODE	Stores tracking code for donations, part of eShop	Donations may not be attributable to specific fundraising campaigns	No	Yes
